

Description of Texas FTE files

The first three files came directly from matching and have the original columns. The remaining files are mergers of the Medicaid and CHIP parts, thus contain dual columns from both parts. Each column has a suffix, _med or _chip.

TX_final_specialty_sum_med_n_both.csv	Includes all Medicaid rows, including dentists who also appear in the CHIP FTE file.
TX_final_specialty_sum_chip_n_both.csv	Includes all CHIP rows, including dentists who also appear in the Medicaid FTE file.
TX_final_specialty_sum_bod_va_cleared.csv	All BOD rows (GPS to be retrieved at a later time)
TX_FTE_outer_join.csv	This includes all rows from joining the Medicaid and CHIP FTE files. Each column has a suffix, _med or _chip, that indicates whether it is from Medicaid or CHIP. For this and all files below, please use the suffix to determine whether a column comes from Medicaid or CHIP.
TX_FTE_accepting_chip_only.csv	Includes rows of locations accepting CHIP only
TX_FTE_accepting_med_only.csv	Includes rows of locations accepting Medicaid only
tx_FTE_accepting_both_med_n_chip.csv	Includes only the rows of locations that are present in both the Medicaid and CHIP FTE file.
